

The Upper Peninsula Professional Trades Career Day has been scheduled for April 26. The event gives 11th and 12th grade students a chance to work with hands-on demonstrations and learn how to enter various career fields. The event will be held at the Sault Ste. Marie EDC.

The Natural Resource Program will be one of the programs from across the state to represent CTE at the Lansing Capitol Showcase on April 28. The showcase is the ideal time to help legislative decision makers understand the dynamic ways in which CTE programs prepare students to be college and career ready. Both students and teachers must be prepared to discuss Career & Technical Education and their program in detail, including how core academic classes are integrated.
