NWEA MAP Student Growth Summary Reports (Fall 2022 – Spring 2023)

Math: Math K-12

Language Arts: Reading

Our regional Fall-to-Spring data looks good. In all but one grade for Math and two grades for Reading our students met or exceeded their growth goals. The projected proficiency for the M-STEP is higher this year than last year as well, in all grades 3-7 for reading and all but one grade for math. This is definitely something to celebrate!

There are other pieces of this data to consider as well: In some cases, our overall percentiles are still low, so we need to keep working on our trajectory to student success. Some keys to this will be instructional leadership, investment in teachers, asset management, and multi-tiered systems of support.
